 Cosmetic & Beauty

 Food & Beverage

 Medical & Pharmaceutical

 Toys, Games & Sporting Goods

## ECO-FRIENDLY

Imperial is an environmentally conscious paper box manufacturer which offers a **Green** option for your paper box manufacturing needs. Since Imperial's inception, the company has offered cost-effective and environmentally friendly recycled paperboard. More than 75% of our products are made from recycled materials. These recycled materials primarily consist of post-consumer material, which is material discarded after consumer use that has been separated from solid waste to be recycled into new paper. Recycled paperboard is one of the best options for an environmentally friendly minded business or organization to use. In addition, all of our paperboard is 100% recyclable.

We also recycle everything we can. This includes:

- Paperboard waste generated during the printing process as well as office paper
- Wood products, such as pallets and off-cuts
- Metal, including all aluminum plating materials and metal straps
- Liquid wastes such as oil

Unlike many other paper box manufacturing companies, we separate our scrap paper into several different categories before it gets picked up. This greatly reduces natural resources used in milling virgin paper. The paper waste we recycle saves thousands of trees each year.

In addition, our production area has abundant natural sunlight, thereby reducing the need for electricity.

If you wish to discuss your eco-friendly packaging call us at 310-323-7300 or [email us](mailto:info@imperialbox.net).
